SUMMARY

A Pre-Final year B.Tech student with a good foundation in Java, JavaScript, Object-Oriented Programming, and Data Structures & Algorithms. Experienced in building and deploying full-stack MERN applications with RESTful APIs, authentication, and database design. Delivered a production application for a paying client as a freelance developer. Strong problem-solver focused on writing clean, maintainable code.

TECHNICAL SKILLS

Languages: C, Java, JavaScript, SQL

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, WebSocket

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Databases: MongoDB, MySQL

Libraries & Tools: Mongoose, Git, GitHub, VS Code, Eclipse IDE, Vercel, Thunder Client

EXPERIENCE

Freelance Full Stack Developer

Vijai Bhava Law Firm | Website

Remote

May 2026

- Developed and deployed a production-grade MERN application (React.js, Node.js, Express.js, MongoDB), managing the complete lifecycle from requirement analysis to deployment.
- Designed RESTful APIs, MongoDB data models, and responsive interfaces while collaborating directly with the client through iterative development, testing, Git-based version control, and feature delivery.
- Implemented responsive frontend workflows and backend integrations based on client requirements, ensuring reliable data handling, cross-device usability, and a maintainable production-ready codebase.

PROJECTS

HealthUP – Adaptive Fitness Intelligence Platform | [GitHub](#) | [Live](#)

React.js · Node.js · Express.js · MongoDB · REST API

- Built a full-stack MERN application with RESTful APIs and MongoDB schemas for personalized workout and diet plans and structured health data management.
- Implemented JWT-based authentication, CRUD operations, and responsive dashboards, improving application performance and maintainability through reusable components.
- Developed progress tracking and personalized dashboard workflows to organize user fitness data, workout plans, and health metrics through modular API integrations.

CraveIt – Multi-Role Food Delivery Platform | [GitHub](#) | [Live](#)

React.js · Node.js · Express.js · MongoDB · REST API

- Built a full-stack MERN food delivery platform supporting four role-based dashboards for Customers, Restaurants, Riders, and Administrators with secure JWT authentication and authorization.
- Developed end-to-end order management, restaurant and menu CRUD, rider delivery workflows, profile management, earnings distribution, and Cash on Delivery functionality using RESTful APIs and MongoDB.
- Designed role-specific workflows and reusable frontend components to maintain consistent user experiences while securely managing data and permissions across multiple application roles.

Converse – Real-Time Chat Application | [GitHub](#) | [Live](#)

React.js · Node.js · Express.js · MongoDB · WebSocket

- Built a real-time chat application using WebSocket for low-latency messaging and JWT for secure authentication.
- Designed MongoDB data models and messaging workflows while optimizing frontend and backend performance.
- Implemented real-time communication workflows with secure user sessions, message handling, and responsive chat interfaces for a reliable messaging experience.

EDUCATION

IES College of Technology

Bachelor of Technology in Electronics & Communication Engineering

Bhopal, MP

Sep 2023 – Present

- CGPA: 7.5

ACHIEVEMENTS & CERTIFICATIONS

- 3rd Place**, IIT Bombay Techfest – Bhopal Zone (Sep 2024)
- Finalist**, Odoo Hackathon 2026
- NPTEL Silver Certificate**, Programming in Java
- Solved **100+** Data Structures & Algorithms problems on LeetCode

EXTRA CURRICULAR

- Sanchar Mitra Volunteer**, Department of Telecommunications (DoT, MPLSA) – promoted telecom safety and cyber fraud awareness initiatives.
